```java
for (Link link : pathTransl) {
    String nw = link.getAttribute("nW");
    if (nw != null) {
        nWTransl = Integer.parseInt(nw);
        nWTransl = (int) (nWTransl + Math.ceil(totaltraffic / wavelengthCapacity));
        link.setAttribute("nW", String.valueOf(nWTransl));
    } else {
        nWTransl = (int) Math.ceil(totaltraffic / wavelengthCapacity);
        link.setAttribute("nW", String.valueOf(nWTransl));
    }
}
```
